ABOUT ALLIANZ BACK COVER

Build your future

You've worked hard, and now it's time to start thinking about retirement – whether you want to protect your savings, grow it, or both – we can help.

Allianz® registered index-linked annuities (RILAs) are designed to help you reach your long-term financial goals by offering:

LEVEL OF PROTECTION

Select from index strategies that provide varying levels of protection for the principal you invest if the market drops.

GROWTH POTENTIAL

Have the opportunity to grow your retirement savings by participating in potential index gains.

FLEXIBILITY

If your objectives change or markets evolve, you have the ability to lock values or reallocate.

It's your retirement.

Make it the one you want with help from Allianz.

This material must be preceded or accompanied by the appropriate product profile, Income Benefit rider brochure (IAIP-002), index strategy inserts, and a current prospectus for the Allianz® registered index-linked annuity.

Contact your financial professional or Allianz Life Financial Services, LLC, member FINRA, at 800.624.0197 to obtain a prospectus about the variable option. The prospectuses contain details on investment objectives, risks, fees, and expenses, as well as other information about the registered index-linked annuity and the variable option, which you should carefully consider. Please read the prospectuses thoroughly before sending money.

This content is general information for educational purposes, and is not intended to constitute fiduciary advice. Please consult your financial professional for a specific recommendation about purchasing one of these products.

Product and feature availability may vary by state and broker/dealer.

RILAs explained

RILA stands for registered index-linked annuity.

ANNUITY

An annuity is a financial vehicle that is designed to help you prepare for retirement. Simply put, an annuity is a contract between you and an insurance company: You pay the insurance company purchase payments, and in exchange you get benefits only an annuity can provide. Annuities offer tax-deferred¹ growth potential while you're saving for retirement, and reliable income in the form of annuity or income payments after you retire – in some cases, for as long as you live.²

REGISTERED INDEX-LINKED ANNUITY (RILA)

A registered index-linked annuity, or RILA, is a specific type of annuity that relies on external market performance as measured by an index to determine returns. RILAs offer a unique combination of features including the opportunity to invest with the level of protection and growth potential that can help you achieve your overall financial goals. This is accomplished through a variety of **index options**. RILAs also offer a variety of lifetime payout options and death benefit options.

RILAs are subject to investment risk, including possible loss of principal. Investment returns and principal value will fluctuate with market conditions so that units, upon distribution, may be worth more or less than the original cost.

INDEX OPTIONS

Each index option is a combination of:

A crediting method (also known as an index strategy)	The index	The term (time period for measuring index performance)	A level of protection
<ul style="list-style-type: none"> • Index Performance Strategy • Index Precision Strategy • Index Dual Precision Strategy • Index Guard Strategy • Index Protection Strategy with cap • Index Protection Strategy with Trigger 	<ul style="list-style-type: none"> ■ S&P 500 Index ■ Russell 2000 Index ■ Nasdaq-100 Index ■ iShares MSCI Emerging Markets ETF ■ EURO STOXX 50 	<ul style="list-style-type: none"> • 1-year • 3-year • 6-year 	<ul style="list-style-type: none"> • Buffer • Floor • 100% protection from negative index returns

PLEASE SEE PAGE 7 FOR MORE DETAILS on which indexes, terms, and levels of protection are available with each crediting method.

To see where an Allianz® RILA may be a fit, let's take a closer look at how they can offer a level of **Protection, Growth Potential, and Flexibility.** →

¹ Withdrawals will reduce the contract value and the value of any potential protection benefits. Withdrawals taken within the period stated in the prospectus will be subject to a withdrawal charge or a Market Value Adjustment (MVA), depending on product. All withdrawals are subject to ordinary income tax and, if taken prior to age 59½, may be subject to a 10% federal additional tax.

² As long as you follow the terms of your contract.

Please note that Allianz Life Insurance Company of North America (Allianz), its affiliated companies, and their representatives and employees do not give fiduciary, legal, or tax advice. You are encouraged to consult your tax advisor or attorney.

PRODUCT FEATURE 1

Level of protection – Limit savings loss in a volatile market

Finding opportunities to grow your retirement savings may mean taking on additional risk.

Taking on too much risk could result in large losses due to market volatility. Even worse, these losses could take more time to rebuild than you have left before you retire.

The impact of losses on your retirement timeline

↓ If your portfolio loses	5%	10%	15%	20%	25%	30%	35%	40%	45%	50%
↑ You would need this overall return to break even	5.26%	11.11%	17.65%	25%	33.33%	42.86%	53.85%	66.67%	81.82%	100%

If you started at \$100K and lost 10%, your return would need to be **11.11%** to get back to \$100K.

Three ways an Allianz® RILA could help mitigate loss

Allianz® RILAs can help mitigate your risk by offering varying levels of protection. The index strategies provide a level of protection that absorbs all or a certain percentage of negative index performance.

■ Index Return
■ Negative Performance Credit %

1. Buffer:

we absorb a certain percentage of negative index loss

2. Floor:

you absorb a certain percentage of negative index loss down to the floor and no more

3. 100% protection from negative index returns

negative index loss means nothing is credited, but you won't get a negative Performance Credit

Amounts invested in the index strategy must be held for the full term before you can receive a Performance Credit. A Daily Adjustment is applied if, before the Term End Date, you take a full or partial withdrawal, annuitize the Contract, execute a Performance Lock, a death benefit is paid, or Contract fees and expenses are deducted. The Daily Adjustment for Index Options with a Buffer or Floor may cause you to lose principal and previous earnings even if Index performance is positive on that day or has been positive since the Term Start Date.

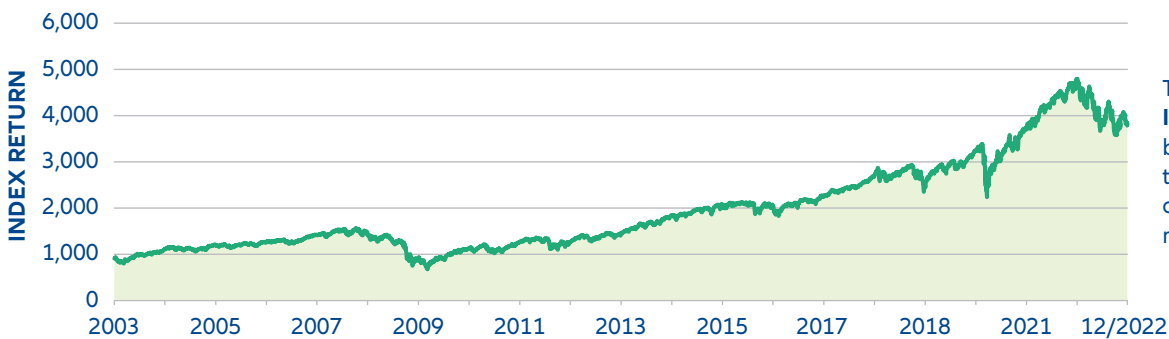

Deductions for applicable contract charges and costs may result in a loss of principal or previously earned Performance Credits and will not receive a Performance Credit on the next Term End Date.

PRODUCT FEATURE 2

Growth potential – Help increase savings with participation in potential index gains

History shows us that even with market losses, it pays to stay invested long-term.

S&P 500® INDEX 20-YR HISTORICAL PERFORMANCE (1/1/2003 - 12/31/2022)

The **S&P 500® Index** acts as a benchmark of the performance of the U.S. stock market overall.

In this chart, the performance of the S&P 500® Index is not intended to represent the performance of any actual investment. You cannot invest directly in an index. The S&P 500® Index is an unmanaged index of 500 companies used to measure large-cap U.S. stock market performance. Performance figures assume dividends are reinvested but do not reflect any fees, expenses, charges, and taxes that may be associated with investing in the financial vehicle. Individual results would be lower if these had been included. Dividends are not included in index returns when determining Performance Credits. Some financial vehicles may include certain limitations such as a cap where you may not realize the full upside potential of the index return, conversely, you may receive some level of downside protection although it may not fully protect against a loss. **Past performance is no guarantee of future results.**

Three ways an Allianz® RILA could help you capture index gains

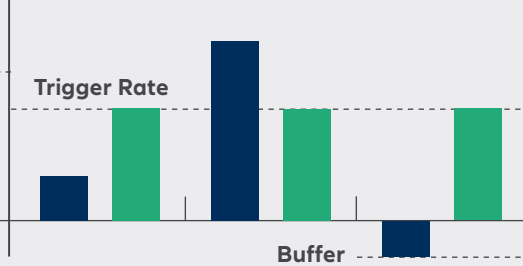

Customize your allocation with one or more index strategies to help provide the growth potential you want with the level of protection you need.

■ Index return
■ Performance Credit %

1. Performance Credit equals index return up to a Cap

2. Performance Credit equals predetermined Trigger Rate if index return is greater than or equal to 0%, or within the Buffer, depending on the crediting method

3. Performance Credit equals index return multiplied by a Participation Rate¹ if index option is uncapped

Allianz® RILAs can give you growth potential through market participation to help you accumulate for retirement. Note that with a RILA you may not be able to participate fully in a market recovery due to limits on upside potential.

¹Participation Rate does not apply to uncapped 1-year Term Index Options

PRODUCT FEATURE 3

Flexibility – A potential solution that evolves with you

Retirement isn't one-size-fits all and neither are our solutions. From the choice to reallocate among the index options if your needs change to the opportunity to potentially capture gains and limit losses, we value your ability to customize a retirement solution.

REALLOCATION

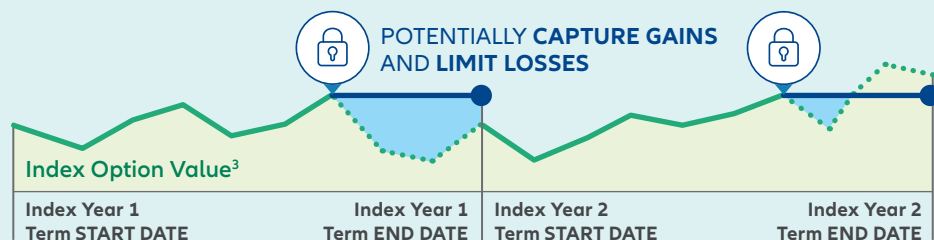

On your Term End Date you can reallocate to a different index option if your needs have changed.

PERFORMANCE LOCK

For added flexibility and a level of control, the **Performance Lock** feature provides you the innovative opportunity to potentially capture gains and limit losses on each index option through the remainder of the index year.¹

The Performance Lock feature has been used over 327,000 times since it launched in 2013.²

Refer to the Performance Lock brochure (RILA-004) for more details.

In order to better understand what Allianz® RILAs offer, **let's take a closer look at your options for index strategies.** →

¹ By executing the Performance Lock, the locked index option will no longer participate in any potential gains or losses or get the daily adjustment for the rest of the index year, or get a Performance Credit.

² Total number of Performance Locks performed with all Allianz Life Insurance Company of North America RILAs from 9/16/2013 to 12/31/2022, including products that may no longer be available. The total number of contracts used for this analysis was 79,936. Potential Performance Credit varies by index option. Past performance is not an indication of future results.

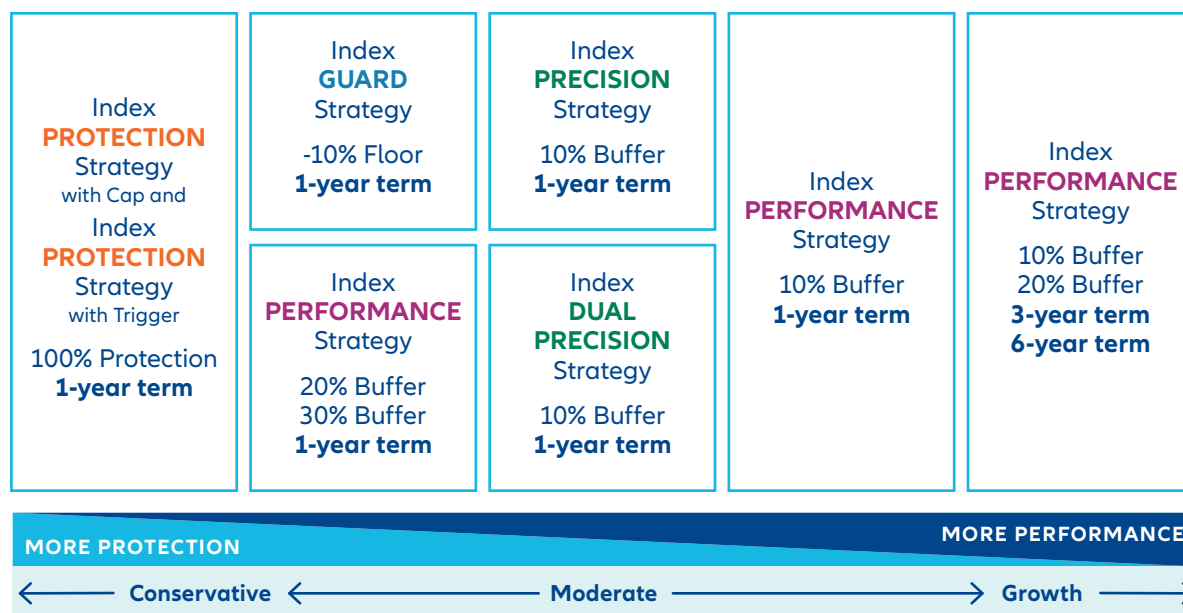

³ Index Option Value changes daily through the daily adjustment. The daily adjustment is the estimated present value of the future Performance Credit that will be available on the Term End Date.

Executing a Performance Lock or Early Reallocation may result in you receiving less than the Performance Credit you would have received had you not locked the index option. It is possible to lock in a negative return with all index options except Index Protection Strategy with Trigger and Index Protection Strategy with Cap. We will not execute your request for a Performance Lock on Index Protection Strategy with Trigger or Index Protection Strategy with Cap if the Daily Adjustment is zero. We will not provide advice or notify you regarding whether you should execute a Performance Lock or Early Reallocation, the optimal time to do so, or if you execute a Performance Lock or Early Reallocation at a sub-optimal time. We are not responsible for any losses related to your decision whether or not to execute a Performance Lock or Early Reallocation.

Build a foundation for your retirement by allocating to one or more index options.

Index strategies

Customize your allocations with at least one or more index strategies, each offering a unique risk/return objective to help meet various investor profiles.

This hypothetical chart is provided for illustrative purposes and is not intended to predict or project actual results. It is provided to show the general risk/return objective of the index options and the various investor profiles.

INDEXES AVAILABLE with the Allianz® RILA index strategies

Because indexes may perform differently under similar market conditions, Allianz® RILAs offer five indexes:

- S&P 500® Index**

A large-cap American stock market index based on market capitalizations of 500 companies. Often considered one of the best overall representations of the U.S. stock market.
- Russell 2000® Index**

A small-cap stock market index of the smallest 2,000 companies in the Russell 3000 index. A common benchmark for companies that identify as small-cap based on market capitalization.
- Nasdaq-100® Index**

A large-cap market index that includes 100 of the largest domestic and international nonfinancial securities listed on the Nasdaq Stock Market.
- iShares® MSCI Emerging Markets ETF**

An exchange-traded fund that seeks to track the investment results of the MSCI Emerging Markets Index, which is designed to measure equity market performance in the global emerging markets. The underlying index may include large- and mid-capitalization companies.
- EURO STOXX 50®**

An international stock market index that provides a blue-chip representation of supersector leaders in the Eurozone. The index covers 50 stocks from 11 Eurozone countries.

6 Although an index or indexes will affect your Index Option Values, the Index Options do not directly participate in any stock or equity investment and are not a direct investment in an index.

	Index PERFORMANCE Strategy	Index PERFORMANCE Strategy	Index PRECISION Strategy	Index Dual PRECISION Strategy	Index GUARD Strategy	Index PROTECTION Strategy with Cap and Index PROTECTION Strategy with Trigger ¹
Term length	Multi-year terms 6 or 3 years	1-year term	1-year term	1-year term	1-year term	1-year term

Indexes available	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index 	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index ■ Nasdaq-100® Index ■ iShares® MSCI Emerging Markets ETF ■ EURO STOXX 50® 	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index ■ Nasdaq-100® Index ■ iShares® MSCI Emerging Markets ETF ■ EURO STOXX 50® 	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index ■ Nasdaq-100® Index ■ iShares® MSCI Emerging Markets ETF ■ EURO STOXX 50® 	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index ■ Nasdaq-100® Index ■ iShares® MSCI Emerging Markets ETF ■ EURO STOXX 50® 	<ul style="list-style-type: none"> ■ S&P 500® Index ■ Russell 2000® Index ■ Nasdaq-100® Index ■ iShares® MSCI Emerging Markets ETF ■ EURO STOXX 50®
If market is UP	A longer term provides the greatest performance potential (includes a participation rate and may be capped or uncapped)	Provides different levels of performance potential (may be capped or uncapped) based on the level of buffered protection	Credits an annual predetermined Trigger Rate if the change in annual index value is zero, or positive	Credits an annual predetermined Trigger Rate if the change in annual index value is positive, zero, or negative and within the buffer	Provides performance potential up to a cap	Offers less growth potential than other index strategies with lower caps and Trigger Rates, which apply if the annual change in index value is zero or positive
If market is DOWN	Provides a level of protection with a buffer that absorbs a certain percentage of negative index performance	Provides a level of protection with a buffer that absorbs a certain percentage of negative index performance	Provides a level of protection with a buffer that absorbs the first 10% of negative index performance	Provides a level of protection. Negative performance within the 10% Buffer provides a positive credit of the Trigger Rate, but if it exceeds the buffer it provides a negative credit equal to the amount of return in excess of the buffer.	Provides protection with a -10% Floor, which means you assume the first 10% negative index loss and no more	Provides the most protection with no losses due to negative index returns
Market environment	May be more favorable in a longer period of market growth with some protection from index losses	May be more favorable in a strong market with some protection from index losses	May be more favorable in a low-growth environment with protection from smaller index losses	May be more favorable in a low-growth environment with protection and growth potential from smaller index losses	May be more favorable in a strong market with protection from large index losses	May be more favorable in a low-growth environment with protection from all index losses

Deductions for Contract fees and charges may result in a loss of principal and previously applied Performance Credits. They also reduce the amount available to receive future Performance Credits.

¹ Index Protection Strategy with Cap and the Index Protection Strategy with Trigger are the only options available while receiving income.

True to our promises so you can be true to yours®

A leading provider of annuities and life insurance, Allianz Life Insurance Company of North America (Allianz) bases each decision on a philosophy of being true: **True to our strength** as a key part of a leading global financial organization. **True to our passion** for making wise investment decisions. **True to building a culture** where everyone feels welcomed, included, and valued. And **true to the people we serve**, each and every day.

Through a line of innovative products and a network of trusted financial professionals, and with 3.7 million contracts issued, Allianz helps people as they seek to achieve their financial and retirement goals. Founded in 1896, Allianz is proud to play a vital role in the success of our global parent, Allianz SE, one of the world's largest financial services companies.

While we are proud of our financial strength, we are made of much more than our balance sheet. By being true to our commitments and keeping our promises, we believe we make a real difference for our clients. It's why so many people rely on Allianz today and count on us for tomorrow – when they need us most.
