Deduction of the annual product fee of 1.25%, withdrawal charge, \$50 contract maintenance charge (on contracts with less than \$100,000 contract value), and, if applicable, the 0.20% Maximum Anniversary Value Death Benefit rider fee may result in a loss of principal or previously earned performance credits, which are the returns you may receive from the index options. The annual product and rider fees are deducted quarterly and are calculated as a percentage of the charge base, which is the contract value on the preceding quarterly contract anniversary, adjusted for subsequent purchase payments and withdrawals.

Please note:

- The Index Effective Date cannot be the 29th, 30th, or 31st of a month. On those days we change the Index Effective Date to be the next business day. This is important because if you want the earliest Index Effective Date and your issue date is one of these three days, your Index Effective Date will be different from your issue date.
- Initial rates for new contracts are set on the Index Effective Date, which is the first Term Start Date, and is the first date your money has the opportunity to be allocated to an index option.
- The guaranteed minimum rates for each index option are:
 - » 10%: Index Performance Strategy 6-year term cap
 - » 8%: Index Dual Precision Strategy 6-year term trigger rate
 - » 5%: Index Performance Strategy 3-year term cap
 - » 4%: Index Dual Precision Strategy 3-year term trigger rate
 - » 2%: Index Performance Strategy 1-year term cap, Index Dual Precision Strategy 1-year term trigger rate, Index Precision Strategy trigger rate, Index Guard Strategy cap
 - » 1.50%: Index Protection Strategy with Trigger
 - » 100% participation rate: Index Performance Strategy 3-year and 6-year term
- Once the contract is issued, these rates can change on each new Term Start Date at the discretion of the company and subject to the guaranteed minimums.
