- Minimum initial: $10,000
- Minimum subsequent: $50
- Maximum: $1,000,000

#### Withdrawal charge schedule
6 years for each purchase payment (6.5%, 6%, 5%, 4%, 3%, 2%, 0%): All withdrawals are subject to ordinary income tax and, if taken prior to age 59½, may be subject to a 10% federal additional tax.

#### Product fee
0.25% calculated as a percentage of the charge base, which is the contract value on the preceding quarterly contract anniversary, adjusted for subsequent purchase payments and withdrawals

#### Free withdrawal privilege
10% of total purchase payments, available annually; any unused portion does not carry over from one year to the next.

### Death benefit
Choose between two benefits both available only during the accumulation phase upon the first death of an owner named at issue:
- Traditional Death Benefit: greater of contract value, or total purchase payments adjusted for withdrawals
- Maximum Anniversary Value Death Benefit available for issue age 0-75 (optional for an additional 0.20% rider fee): greater of contract value or Maximum Anniversary Value

If there is a change in ownership, the death benefit may be reduced.

1 Allianz reserves the right to decline any or all purchase payments at any time on a nondiscriminatory basis. Purchase payments can only move into index options on the Index Effective Date or an Index Anniversary. Purchase payments received on days other than the Index Effective Date or an Index Anniversary will be placed in the AZL® Government Money Market Fund until the Index Effective Date or next Index Anniversary. At the Index Effective Date or Index Anniversary we will transfer those allocations in the AZL Government Money Market Fund to the applicable index options.

2 The AZL investment options are managed by an affiliate of Allianz Life Insurance Company of North America and Allianz Life Financial Services, LLC. All are affiliated companies.

3 This investment option is subadvised. The subadvisor may have a public mutual fund with an investment objective that is similar to that of this investment option. These are separate portfolios that will have different performance due to differing fees, expenses, relative cash flows, portfolio sizes, and other factors.

4 Please see the product and fund prospectuses for more information regarding the fee associated with variable options.

5 This investment option invests in derivative instruments such as futures, options, and swap agreements. Derivatives can increase the investment option’s price volatility and could magnify losses. Certain derivative instruments also involve costs that could reduce returns. Certain derivatives may involve risk of default.

6 Manager Allocation Risk: The risk refers to the possibility that the manager could allocate assets in a manner that will cause the funds to underperform other funds with similar investment objectives. The manager may have a potential conflict of interest in allocating assets among and between the permitted underlying funds because the subadvisory fee rate it pays to the subadvisors of the permitted underlying funds is different.

7 Generally under normal conditions, 5% (up to 20%) of the investment option is invested in derivative instruments such as futures, options, and swap agreements. Derivatives increase the investment option’s price volatility and could magnify losses. Derivative instruments also involve costs that could reduce returns. Certain derivatives may involve risk of default.

8 Manager Allocation Risk: The risk refers to the possibility that the manager could allocate assets in a manner that will cause the funds to underperform other funds with similar investment objectives. The manager may have a potential conflict of interest in allocating assets among and between the permitted underlying funds because the subadvisory fee rate it pays to the subadvisors of the permitted underlying funds is different.

9 No single crediting method or index option consistently delivers the most return generally under normal conditions, 5% (up to 20%) of the investment option is invested in derivative instruments such as futures, options, and swap agreements.
