The Index Guard Strategy

Potential for higher performance with a level of protection from smaller index losses.

The Index Guard Strategy may be a good choice if you are looking for a level of protection from more severe index losses, while maintaining the potential for growth opportunities.

See how it works with four possible outcomes:

**POSSIBLE OUTCOME 1:**
If the annual index return is positive, but less than the declared cap, the annual performance credit would be equal to the index return.

**POSSIBLE OUTCOME 2:**
If the annual index return exceeds the declared cap, a performance credit equal to the cap would be applied.

**POSSIBLE OUTCOME 3:**
If the annual index return is negative, but within the -10% floor, there would be a negative performance credit equal to the index return.

**POSSIBLE OUTCOME 4:**
If the annual index return is negative and below the -10% floor, the negative performance credit would be limited to the -10% floor.

Important things to know:

• Caps can be different between newly issued contracts and inforce contracts, and they can be different between inforce contracts issued on different days and in different years.
• Caps can also be different for each index option.
• Caps are subject to change annually on the Term Start Date, and will never be less than the minimum cap.
• -10% floor for the currently available Index Guard Strategy Index Options cannot change.
• Amounts deducted for applicable fees and charges may result in a loss of principal or previously earned performance credits, and will not receive a performance credit on the next Term End Date.

Call your financial professional or Allianz Life Financial Services, LLC, member FINRA, at 800.624.0197 to obtain a prospectus about any available Allianz variable options. The prospectuses contain details on investment objectives, risks, fees, and expenses, as well as other information about the registered index-linked annuities and available variable options, which you should carefully consider. Please read the prospectuses thoroughly before sending money.

This hypothetical example shows conceptually how the Index Guard Strategy Index Options might work in different market index environments and assumes no change in the hypothetical cap. It does not predict or project the actual performance of the Allianz registered index-linked annuity with the Index Guard Strategy Index Options. This example does not reflect deductions for contract fees and expenses.

Although an index or indexes will affect your Index Option Values, the Index Options do not directly participate in any stock or equity investment and are not a direct investment in an index.

All annuity contract and rider guarantees, or annuity payout rates, are backed by the claims-paying ability of the issuing insurance company. They are not backed by the broker/dealer from which this annuity is purchased, by the insurance agency from which this annuity is purchased, or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability of Allianz Life Insurance Company of North America (Allianz). Guarantees do not apply to the performance of the variable subaccounts, which will fluctuate with market conditions.
