***You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.** The Fund is managed by an affiliate of Allianz Life Insurance Company of New York and Allianz Life Financial Services, LLC. All are affiliated companies. This Fund is subadvised. The subadvisor may have a public mutual fund with an investment objective that is similar to that of this Fund but will have different performance due to differing fees, expenses, relative cash flows, portfolio sizes, and other factors. Please see the product and Fund prospectus for more information regarding the fees associated with the AZL[®] Government Money Market Fund.

¹**We restrict additional purchase payments.** Each Index Year you cannot add more than your initial amount (total of all purchase payments received before the first Quarterly Contract Anniversary of the first Contract Year). We allow you to add up to the initial amount in the remainder of the first Index Year. Unless an early reallocation request is submitted, the purchase payments can only move into index options on the Index Effective Date or an Index Anniversary. Purchase payments received on any other day will first be held in the AZL[®] Government Money Market Fund. At the Index Effective Date or next Index Anniversary or as part of an early reallocation request we will transfer those assets to the selected index options.

²The daily adjustment can be negative. You will lose money if the daily adjustment is negative. The daily adjustment could reflect significantly less gain, or more loss than we would apply to an index option on the Term End Date. If you select multiple multi-year term index options, there may be no time that your contract value is not subject to at least one daily adjustment.

³No single crediting method or index option consistently delivers the most return under all market conditions.
