

INDEXED UNIVERSAL LIFE INSURANCE

Flexible loan options to help address future needs

Access your policy’s available cash value.

Many people purchase life insurance for the death benefit protection it provides to beneficiaries.¹ And insurance policies also give you the **opportunity to build accumulation value, tax-deferred**. You can then access any available cash value through **policy loans (or withdrawals) that are generally income-tax-free for future needs,**² such as:

To supplement retirement income

For health emergencies

To supplement college funding

To help address other financial needs

To provide you with **flexibility and choices**, our IUL product offers both fixed rate loans and indexed rate loans. We stand out by offering:

- Flexibility to switch between loan types each policy anniversary
- The ability to blend loan types (e.g., 50% indexed loans and 50% fixed loans)
- Indexed loans: 5% annual up front charged rate is guaranteed for the life of the policy.³ Each year the loan is outstanding, the loaned amount has the potential to receive indexed interest.
- Fixed loans:
 - Years 1-10: 2.91% annual up front charged rate that’s guaranteed for the life of the policy.⁴ Each year the loan is outstanding, the loaned amount will receive a 2% credit.
 - Years 11+: 1.96% annual up front charged rate, guaranteed for the life of the policy.⁵ Each year the loan is outstanding, the loaned amount will receive a 2% credit.

Must be accompanied by the “Understanding IUL” brochure (M-3959) or appropriate consumer product brochure.

IUL is not a source of guaranteed income in retirement. There is no guarantee the policy will earn sufficient interest to support a loan strategy.

¹ The death benefit is generally income-tax-free when passed on to beneficiaries.

² Policy loans and withdrawals will reduce the available cash value and death benefit and may cause the policy to lapse, or affect guarantees against lapse. Withdrawals in excess of premiums paid will be subject to ordinary income tax. Additional premium payments may be required to keep the policy in force. In the event of a lapse, outstanding policy loans in excess of unrecovered cost basis will be subject to ordinary income tax. If a policy is a modified endowment contract (MEC), policy loans and withdrawals will be taxable as ordinary income to the extent there are earnings in the policy. If any of these features are exercised prior to age 59½ on a MEC, a 10% federal additional tax may be imposed. Tax laws are subject to change and you should consult a tax professional.

³ The indexed loan charged rate is the Loan Index Charge Rate.

⁴ The fixed loan charged rate in years 1-10 is called the Initial Loan Period Fixed Charge Rate.

⁵ The fixed loan charged rate in years 11+ is called the Fixed Charge Rate.

Access loans when you want, for **what you want.**

Loans you take from your policy do not have to be repaid and can be used when you want, for what you want. Keep in mind that outstanding loan balances will be deducted from the death benefit when the insured passes away. You should carefully manage your policy values to avoid policy lapse or adverse tax consequences. Whether you take a loan to make a down payment on a beach house or help supplement retirement income, it can help when you need it most.
