Income payments can begin after three years and as early as age 50. Joint Lifetime Income Percentages are 0.50% lower than for single Lifetime Income Percentage. Any additional purchase payment will adjust each Lifetime Income Percentage on the next Index Anniversary that occurs on or after the payment is received, which is based on the income percentage for the eligible person's current age and the variable account value's percentage of total contract value as described in the prospectus.

The Lifetime Income Percentage charts for Level and Increasing Income begin at index year three, reflecting the first opportunity a client could begin income.
