¹ Annual point-to-point, MY 2-year point-to-point, and MY 5-year point-to-point crediting methods are subject to an allocation charge, deducted annually from the contract accumulation value and guaranteed minimum value (in most states). The current allocation charge percentage is 0.00%. After contract issue, the allocation charge percentage can only change when specified criteria are met, and can never be greater than the maximum allocation charge percentage of 2.5%. The specific criteria we monitor are the annual average U.S. 10-year Treasury rate for the calendar year, corporate bond downgrades for the calendar year, and investment-grade corporate bond defaults for the calendar year. We chose these criteria because they are related to the performance of the assets we use to provide the guaranteed portions of our fixed index annuities. Keep in mind that if the charge is triggered and implemented on the product, it may persist beyond the market conditions that triggered the charge. For more information refer to M-7381.

Lifetime withdrawal percentages

This table shows the withdrawal percentages that will apply based on the age when income withdrawals are started.

Age	Single life payment	Joint life payment
50-54	3.10%	2.60%
55-59	3.60%	3.10%
60-69	4.10%	3.60%
70-79	4.60%	4.10%
80+	5.10%	4.60%

The caps, spreads, participation rates, interest rate, and allocation charge percentage specified above are set at issue and guaranteed for the first crediting period. Subsequent rates will be set on each contract anniversary. The minimum monthly cap for the monthly sum with a cap crediting method is 0.50%. The minimum annual cap for the annual point-to-point with a cap crediting method is 0.25%. The maximum annual spread for the annual point-to-point with a spread crediting method is 12%. The minimum annual participation rate for the annual point-to-point with a participation rate and 2-year point-to-point with a participation rate crediting methods is 5%. The minimum fixed interest rate is 0.10%. Rates may vary by state.

The PIV bonus, PIV interest bonus percentages, accumulation value interest factors, lifetime withdrawal percentage table, and maximum allocation charge percentage are set at issue based on the date Allianz

receives the application and are guaranteed for the life of the contract.

Both the premium bonus and interest bonus are credited only to the Protected Income Value (PIV). To receive the PIV, including the value of these bonuses, lifetime withdrawals must be taken. You will not receive these bonuses if the contract is fully surrendered or if traditional annuitization payments are taken. If it is partially surrendered, the PIV will be reduced proportionally, which could result in a partial loss of bonuses. Lifetime withdrawals are considered partial withdrawals and are subject to ordinary income tax and, if taken prior to 59½, a 10% federal additional tax. Because this is a bonus annuity, it may include higher surrender charges, longer surrender charge periods, lower caps, higher spreads, or other restrictions that are not included in similar annuities that don't offer a bonus feature.
