

ALLIANZ® FIXED INDEX ANNUITIES

Allianz Accumulation Advantage® Annuity

Guide to current rates as of 5/6/2025

New business rates are not guaranteed and are subject to change at the discretion of Allianz. To find the current rates, visit www.allianzlife.com/rates. The participation rate on Allianz® fixed index annuities is 100% unless otherwise noted.

The rates are current only as of the date indicated above. New and pending applications are eligible for a 60-day rate lock where clients are eligible for the higher of the rates available during that period. If a pending application is not fully funded within 60 days of receipt, it will receive the current rates available at the time it is funded. For multi-year crediting methods, we look at the rate declared for the final year of the initial crediting period.

¹ New business rates are subject to change each month. After the second year, renewal rates will be declared on the contract anniversary and guaranteed for the following contract year. While we manage renewal rates off of the base rate, they may vary from year to year.

² Index not available in Iowa.

³ MY 2-year point-to-point and MY 5-year point-to-point crediting methods are subject to an allocation charge, deducted annually from the contract accumulation value and guaranteed minimum value (in most states). The current allocation charge percentage is 0.00%. After contract issue, the allocation charge percentage can only change when specified criteria are met, and can never be greater than the maximum allocation charge percentage of 2.5%. The specific criteria we monitor are the annual average U.S. 10-year Treasury rate for the calendar year, corporate bond downgrades for the calendar year, and investment-grade corporate bond defaults for the calendar year. We chose these criteria because they are related to the performance of the assets we use to provide the guaranteed portions of our fixed index annuities. Keep in mind that if the charge is triggered and implemented on the product, it may persist beyond the market conditions that triggered the charge. For more information refer to M-7381.

This material must be accompanied by a current Allianz Accumulation Advantage® Annuity consumer brochure (AAA-001).

The indexes available within the contract are constructed to keep track of diverse segments of the U.S. or international markets, or specific market sectors. These indexes are benchmarks only. Indexes can have different constituents and weighting methodologies. Some indexes have multiple versions that can weight components or may track the impact of dividends differently. Although an index may affect interest credited, clients cannot purchase, directly participate in, or receive dividend payments from any of them through the annuity contract.
